

TALENT ACQUISITION

East Sea Energy Environment was set up on the passion of founders to associate create a better everyday condition for society. We focus on energy optimization and environmental control. Our aim is to utilize newest technologies from international partners, combine with internal resource and excellent customer experience, to offer optimal solutions to our clients.

We, East Sea Energy Environment is looking for the following position:

SENIOR SERVICE ENGINEER (Quantity: 01)

Location: No. 19, 64TML Street, Cat Lai Ward, HCMC, Viet Nam

Responsibilities:

1. Installation & Commissioning

- Team Assignment: Receive technical information and strategically assign team members to specific installation and commissioning tasks.
- Project Planning: Develop detailed installation plans and progress schedules for equipment including UPS, AHF, and Power Quality (PQ) systems.
- Resource Allocation: Ensure adequate manpower is deployed across multiple concurrent projects to maintain delivery timelines.
- End-to-End Management: Oversee the full lifecycle of onsite works, including materials handling, installation, testing, commissioning, and final hand-over.
- Risk Mitigation: Proactively identify and manage risks such as material delivery delays or technical issues during installation.
- Site Supervision: Conduct regular site visits to ensure workmanship meets both company standards and client specifications.

2. Power Quality (PQ) Services

- Technical Analysis: Perform inspections, measurements, and detailed analysis of technical issues related to power quality based on customer requests.
- Project Transition: Manage the formal handover process from the Project Management department for PQ projects delivered to customers.
- Post-Handover Support: Act as the primary technical point of contact for resolving issues that arise after project completion.
- Reporting: Prepare comprehensive power quality audit reports and recommend corrective actions to clients.

3. Service Operations & Support

- Solution Development: Plan service implementation and determine the most suitable technical solutions for diverse client environments.

- Customized Programming: Develop specialized service programs tailored to specific customer requirements.
- Maintenance & Troubleshooting: Execute 24/7 technical support and maintenance services to ensure the stable operation of delivered instruments and integrated systems.
- Performance Monitoring: Verify that all systems operate accurately and achieve the desired performance metrics.
- Documentation Management: Maintain and organize all relevant technical data, catalogues, engineering standards, and accessory lists.

Leadership & Management Roles

- Workforce Monitoring: Monitor staff performance via detailed reports and provide support to team members facing complex technical difficulties.
- Performance Evaluation: Summarize completed works and evaluate KPIs for all team members.
- Training & Development: Implement technical training programs for both internal staff and customer engineers/workers.
- Compliance & Safety: Enforce Occupational Health and Safety (OHS) rules and ensure all activities align with company values.

Requirements & Qualifications

- Education: University Degree in Electrical/Electronic or Automation Engineering.
- Experience: Approximately **2-3 years** of experience in Electrical/Electronic Automation equipment or field instruments.
- Technical Knowledge:
 - Familiarity with PLC, UPS, AHF, Switchgear, transformers, and electrical drawings.
 - Proficiency in Automation software, Microsoft Office, AutoCAD, and E-Plan.
- Key Skills:
 - Strong project management skills and experience in Industrial Production or F&B factories.
 - Effective communication, decisive action, and resilience under pressure.
 - Professional English proficiency
 - Willingness to travel to Domestic and International projects/sites assignments.

Benefits:

At ESEC, you will be in the right place to grow – both professionally and personally.

- You'll be inspired by the meaningful projects we do: Sustainable projects, Green activities, and Community-oriented activities.
- You'll collaborate with global leaders such as IBM, AVEVA, ETAP, Schneider, Siemens, and ABB with many internal and external training courses.

- We embrace the Owner mindset & working style – Encouraging creativity, taking initiative, and focusing on delivering results.
- You'll also enjoy a supportive working environment with:
 - Outing Trips, Sport Clubs & YEP with family invitation
 - Bonuses on holidays, loyalty rewards
 - Other activities centered around people and culture

Because at ESEC, you are not just an employee – you're part of the team.
